TECHNICAL SKILLS

Programming & Web:

HTML, CSS, JavaScript, TypeScript, React, Next.js, TailwindCSS, Python

Design Tools:

Figma, Adobe XD, InVision, Framer, Webflow, Wix, Spline

Networking & IT:

Cisco Packet Tracer, Windows/Linux Administration

Version Control:

GitHub

PERSONAL DETAILS

Nationality: Nigerian

ABOUT ME

I'm a versatile and solution-driven Computer Engineering graduate with a passion for technology, problem-solving, and innovation. I have experience across IT support, web development, UI/UX design, and embedded systems, with a solid foundation in networking, troubleshooting, and software development. I enjoy learning new tools and frameworks, collaborating with cross-functional teams, and creating digital solutions that make a real impact.

WORK EXPERIENCE

React Developer — Freelance

Sep 2025 – December 2025

Remote

- Developing and maintaining scalable frontend applications using React, TypeScript, and Tailwind CSS.
- Implementing component-based architecture with type safety for robust and maintainable codebases.
- Collaborating with clients to translate UI/UX designs into functional, responsive, and high-performance interfaces.

Webflow Developer — Freelance Project

Short-term Project, 2025

Remote

- Assisted in integrating core functionalities into an existing Webflow website.
- Embedded custom JavaScript snippets, configured payment integrations, and optimized form handling for better user experience.
- Leveraged deep CSS expertise to fine-tune layouts and animations beyond Webflow's default settings.
- Strengthened proficiency in Webflow CMS, interactions, and no-code automation workflows.

Frontend Web Developer || Designer — Codecafe

Jul 2025 – Sepetember 2025

Lagos, Nigeria

- Engineered responsive, accessible interfaces using Next.js, TypeScript, and TailwindCSS, improving site performance and ensuring long-term scalability.
- Integrated RESTful APIs and real-time updates that enhanced user interactivity, reducing bounce rates by 18%.
- Applied DRY and modular coding principles, creating a shared component library that cut future development time by 30%.
- Collaborated in an Agile/Scrum environment, using GitHub for version control and issue tracking.

Product Design Facilitator — 3MTT

Aug 2024 – Nov 2024

Ibadan, Nigeria

- Conducted hands-on UI/UX design training with Figma and InVision, equipping participants with industry-ready skills.
- Mentored design teams through end-to-end prototyping, resulting in 80% of groups delivering high-fidelity prototypes.
- Designed and implemented a feedback & iteration framework, increasing participant satisfaction scores by 30%.
- Coordinated cross-functional workshops bridging design with frontend dev teams, ensuring design-to-code consistency.

Frontend Web Developer (NYSC) — Aorthar Agency

Dec 2023 – Oct 2024

Lagos, Nigeria

- Developed mobile-first, high-performing UIs with React and TailwindCSS, leading to a 25% increase in user engagement.
- Partnered with backend developers to integrate secure RESTful APIs, improving data flow

reliability across applications.

- Refactored legacy codebase, reducing load time by 15% and improving maintainability.
- Implemented responsive design best practices, ensuring cross-device compatibility.

Embedded Systems Intern — Mustech Laboratories

Dec 2021 – Aug 2022

Ilorin, Nigeria

- Designed IoT-enabled microcontroller systems using Arduino and ESP32, increasing process efficiency by 20%.
- Conducted hardware debugging and firmware testing, reducing system errors by 15%.
- Collaborated with senior engineers to create embedded prototypes for real-world applications in automation and monitoring.

IT Support Intern — AIT Links

Jun 2020 – Sep 2020

Ilorin, Nigeria

- Delivered technical support to 50+ end users, achieving a 98% issue resolution rate within SLA targets.
- Installed, configured, and maintained Windows/Linux operating systems across business environments.
- Assembled and optimized hardware systems for SMEs, improving workstation reliability and reducing downtime.

EDUCATION

Bachelor of Engineering (B.Eng) in Computer Engineering

University of Ilorin, Nigeria

Jan 2018 - October 2023

COURSES & CERTIFICATIONS

• Python for Data Structures & Algorithms — Coursera

• Cloud Security + DevOps — Digital Witch (Ongoing)

TECHNICAL PROJECTS

• Speed Radar System: Designed an IoT-enabled radar solution with microcontrollers and a React web interface for real-time violation logging. Reduced manual errors in traffic enforcement by 40%.

• Catalogue Management Platform: Developed a digital collection management app using Next.js, TypeScript, and TailwindCSS, enabling efficient CRUD operations. Improved client content handling efficiency by 35%.

• Network Optimization Tool: Simulated network topologies in Cisco Packet Tracer to diagnose bottlenecks, achieving a 25% reduction in latency and improving network throughput.
